RE:

Estill Ranches LLC, a California limited liability company; Jewell M. Estill, Trustee of the Jewell M. Estill Living Trust dated November 15, 1983; John B. Estill and Lani L. Estill

NOTICE OF PLEDGE

Please be notified that the undersigned has executed two deeds of trust in favor of American AgCredit, PCA, covering certain land in Lassen and Modoc Counties, State of California, together with the right to divert water as more fully described under the following Permits:

Application Number	Permit Number	License Number
19499	13769	11130
20508	14284	10866
22765	15497	10407

TOGETHER WITH any and/or all water and water rights, all ditch and ditch rights appurtenant to the above described property, including but not limited to the right to divert 600 inches of water from Bare Creek as described in a notice dated May 9, 1872, claimed by Thomas Bare and recorded May 11, 1872 in the official records of Modoc County, California, page 2, Book A Water Rights.

Said above referenced permits were issued by the State Water Resources Control Board Division of Water Rights, which said deeds of trust are given to secure a promissory note dated February 11, 2008.

Please file this notice with your records of the above-numbered permits, and direct one copy of any correspondence which could materially affect the beneficiary's security interest to American AgCredit, PCA, at 403 East Highway 395, Alturas, California 96101.

Dated this 11th day of February, 2008.

Water quality and wastewater reclamation

A <u>riparian right</u> enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, water previously stored by others, return flows from use of groundwater, or other "foreign" water to the natural stream system.

An <u>appropriative right</u> is required for use of water on non-riparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914, new appropriators have been required to obtain a permit and license from the State. Appropriative rights can be granted to waters "foreign" to the natural stream system.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users as set forth in Water Code section 5100 with specific exceptions. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversions, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include: (1) Statements of Water Diversion and Use, (2) Information Pertaining to Water Rights in California, and (3) Appropriation of Water in California.

Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or divert water which originates in a different watershed, water previously stored by others, return flows from use of groundwater, or other "foreign" water to the natural stream system.

An <u>appropriative right</u> is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914, new appropriators have been required to obtain a permit and license from the State. Appropriate rights can be granted to waters "foreign" to the natural stream system.

Statements of Water Diversion and Use must be filed by riparian and pre 1914 appropriative water users as set forth in Water Code section 5100 with specific exceptions. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversions, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include: (1) Statements of Water Diversion and Use, (2) Information Pertaining to Water Rights in California, and (3) Appropriation of Water in California.
